Post-Doc Position in Chemo/Bioinformatics

The Unit of Automatic Control and Informatics of the **National Technical University of Athens** is seeking candidates for one **postdoctoral fellowship** to conduct research in **chemo/bioinformatics**. The position will be funded by an FP7-NMP project and is immediately available.

Required Skills and Experience:

- PhD in chemo/bioinformatics or related field (computer science, chemical/materials engineering, systems biology, computational chemistry) focusing on information technologies and preferably previous post-doctoral experience
- Proven experience with applying multivariate statistics, data mining and machine learning methods
- Proven experience with source code development
- Ability to work in a team environment, manage assigned tasks and schedules and meet project deadlines
- Excellent verbal and written communication skills
- Excellent organizational and project management skills
- Excellent command of English

Desirable experience:

- Semantic web technologies (HTML, XML, RDF, ontologies, OWL) and RESTful web services
- Programming/query Languages: MySQL, Java SE/EE
- Netbeans IDE

Please, apply for an interview, sending your detailed CV and transcript of records, to the following e-mail address: controlntualab@gmail.com
