
NIKOLAOS M. TSOUKIAS
Associate Professor
School of Chemical Engineering
National Technical University, Athens
[Tel]: (210) 772-3229
[E-mail]: tsoukias@chemeng.ntua.gr

EDUCATION

- Ph.D.: Engineering, 1999
Dissertation Title: "Characterization of Nitric Oxide exchange in human lungs"
Dissertation Advisor: Steven C. George
University of California, Irvine
- M.S.: Chemical & Biochemical Engineering, 1997
University of California, Irvine
- B.S.: Chemical Engineering, 1994
National Technical University, Athens, Greece

EMPLOYMENT

- (2015) *Associate Professor*, School of Chemical Engineering, NATIONAL TECHNICAL UNIVERSITY, Athens, Greece.
- (2009) *Associate Professor*, Department of Biomedical Engineering, FLORIDA INTERNATIONAL UNIVERSITY, Miami.
- (2003) *Assistant Professor*, Department of Biomedical Engineering, FLORIDA INTERNATIONAL UNIVERSITY, Miami.
- (2002) *Instructor*, Whiting School of Engineering, JOHNS HOPKINS UNIVERSITY, Baltimore.
- (2000) *Postdoctoral Fellow*, Center for Computational Medicine and Biology, Department of Biomedical Engineering, JOHNS HOPKINS UNIVERSITY SCHOOL OF MEDICINE, Baltimore.
- (1999) *Postdoctoral Fellow*, Department of Chemical and Biochemical Engineering UNIVERSITY OF CALIFORNIA, Irvine.

HONORS & AWARDS

- The 2006 Arthur Guyton Award for Excellence in Integrative Physiology
- Support of Competitive Research (SCORE) Research Advancement Award (NIH)

TEACHING EXPERIENCE

- Biological Fluid and Solid Mechanics. (Johns Hopkins Graduate Course)
- Mathematical Modeling of Physiological Systems. (BME 6715: FIU Graduate Course)
- Mathematical Modeling of Cellular Systems. (BME 6716: FIU Graduate Course)
- Nonlinear Systems in Life Sciences. (BME 6705: FIU Graduate Course)
- Biomedical Engineering Modeling and Simulation. (BME 2740: FIU Undergraduate Course)
- Introduction to Biomedical Engineering Computing. (BME 1054L: FIU Online Course)
- Applied Biotechnology (ChemE5195: NTUA Undergraduate Course)
- Computation methods for Engineers (ChemE5269: NTUA Undergraduate Course)
- Bioengineering (NTUA Graduate Course)

ADVISEES

Research Assistant Professors

- Adam Kapela, PhD (2005- 15)
- Mahesh Joshi, PhD (2008- 13)

PhD Students

- Sridevi Nagaraja (2006-11) Shabnam Namin (2006-12)
- Kumpal Madrasi (2007- 12) Tushar Gadkari (2007-13)
- Jaimit Parikh (2009-15) Arash Moshkforoush (2014-)

MS Students (Thesis Option)

- Manu Kanwar (2003-2005) David Isaza (2003-2005)
- Rohit Chawla (2004-2006) Sara Nofallah (2005-2007)

Undergraduate Students

- Haroldo Silva (2003-06) Jennifer Hall (2005-06)
- Luis Alonso (2006-2008) Roxana Ordonez (2006-07)
- Zenith Acosta (2008-10) Carolina Bautista (2008-10)
- Ana Pena (2008-11) Janny Garcia(2009-11)
- Konstantinos Sebekos(2009-11) Caterina Pette (2009-11)
- Cyntia Crespo (2009-10) Natalie Cortes (2011-12)
- Florencia Goluboff (2012-13) Danniell Rodriguez (2012-14)
- Isabella Febbo (2013-14) Claudia Valle (2014-15)

SERVICE AND MEMBERSHIPS

Memberships:

- American Heart Association (AHA)
- American Physiological Society (APS)

- Biomedical Engineering Society (BMES)
- Microcirculatory Society (MCS)

Editorial Boards:

- Microcirculation
- Frontiers in Physiology
- Critical Reviews in Biomedical Engineering
- ISRN Computational Biology

Grant Reviewerships:

- American Heart Association
- National Science Foundation
- National Institutes of Health
- Heart Research UK
- Marsden Fund, Royal Society of New Zealand

Manuscript Reviewerships:

- American Journal of Physiology- Cell Physiology; American Journal of Physiology- Heart and Circulatory Physiology; Biophysical Journal; Journal of Applied Physiology; American Journal of Physiology- Regulatory, Integrative and Comparative Physiology; Microcirculation; Annals of Biomedical Engineering; Journal of Theoretical Biology; European Respiratory Journal; Respiratory Physiology and Neurobiology; Medical Engineering & Physics; American Journal of Physiology- Renal Physiology; Biophysical Chemistry; Journal of Experimental Nanoscience; Contrast Media and Molecular Imaging; Applied Mathematics and Computation; Mathematical Biosciences; Acta Physiologica; Plos Computational Biology; Journal of Physiology; Nitric Oxide Journal; Frontiers in Physiology, Plos One.

University Service:

- Search Committees for Faculty Positions, Member (2004), Chair (2008, 2009, 2011)
- Computational Advisory Committee of the Engineering College, member (2004-06)
- Faculty Council on Governance (2007- 09), (2011-12)
- Curriculum Committee of the College of Engineering, member (2004-06) (2007- 09), chair(09-10, 13-15)
- Biomedical Engineering Graduate Committee (2006-)
- Biomedical Engineering Society, Faculty Mentor (2007-10)
- College of Engineering Research Committee (2010-10)

D) INVITED PRESENTATIONS:

- D1 4th European Symposium on Biomedical Engineering (University of Patras, June 20-25, 2004)
- D2 Department of Chemical & Biomedical Engineering at FAMU-FSU (Tallahassee, November 12, 2004)
- D3 Systems Analysis, Data Mining and Optimization in Biomedicine" (U. of Florida, February 2-4, 2005)

- D4 3rd Summer School on Emerging Technologies in Biomedicine (University of Patras, July 2-7, 2006)
- D5 Mathematical Biosciences Institute (Ohio State University, January 22-26, 2007)
- D6 2007 Experimental Biology (Washington DC, April 28-30, 2007)
- D7 Canadian Physiological Society. University of Victoria, British Columbia, Canada. (Victoria, 29-30 April, 2010).
- D8 8th International Conference on Pathways, Networks, and Systems Medicine. Rhodes 9-14 July, 2010)
- D9 62nd Annual Conference of the Hellenic Society of Biochemistry and Molecular Biology (Athens, December 2011)
- D10 Montreal Heart Institute, University of Montreal. (Montreal, May 2013)
- D11 A multiscale model of biomechanics: From ion channel activity to vasomotor responses. 7th World Congress of Biomechanics, Boston 2014. (Invited presentation)

E) THESIS :

- E1 Study of the shrinkage and porosity in air-drying fruits and vegetables. Diploma Thesis. National Technical University of Athens, Greece, 1994.
- E2 Characterization of Nitric oxide exchange in human lungs. Ph.D. Thesis. University of California, Irvine, 1999.

PATENTS :

- P1 George S.C. and N.M. Tsoukias. An apparatus and method for the estimation of flow independent parameters which characterize the relevant features of Nitric Oxide production and exchange in the human lungs. (*WO 01/82782; US 6,866,637*)
- P2 Kavallieratos, K. Tsoukias, N. M. and Lozano-Lewis; L. Organometallic fluorescent sensors for nitric oxide detection and imaging. (*US 8,906,694*).

RESEARCH FUNDING:

Active:

National Institutes of Health (1 R15HL121778). (*Principal Investigator*): Integrative modeling to link vascular phenotype to gene expression., 08/01/14-07/30/17. Award amount: \$423,680.

National Institutes of Health (1 R01 HL131181). (*PI: M. Nelson*): K⁺ sensing & electrical signaling by Kir channels in brain vasculature, 12/01/2015-12/01/2020. Award amount: \$2,493,263.

Completed:

American Heart Association. National Scientist Development Grant (*PI*): Signal transduction in the regulation of microcirculatory vascular tone involving Nitric Oxide, 07/01/04-06/30/08. Award amount: \$260,000. [Top 1.28 percentile].

National Institutes of Health. Access to Biomedical Research. Faculty Research Enhancement Award: NO/Ca²⁺ measurements in isolated vessels of the microcirculation, 2004. Award amount: \$5,000.

American Physiological Society. Arthur C. Guyton award for excellence in integrative physiology, 2006. Award amount: \$15,000.

Florida International University. Faculty Research Award (*PI*). In vitro models to investigate microcirculatory NO-Ca²⁺ dependent signaling in hypertension, 2007. Award amount: \$22,500.

National Institutes of Health (1SC1HL095101). Support of Competitive Research (SCORE) Research Advancement Award (*Principal Investigator*): Theoretical and experimental investigations of microcirculatory signaling in hypertension, 07/01/08-06/30/13. Award amount: \$1,394,000.
